

## Application and Registration Deadlines to Do Research for Credit - BIOSCI 4950/4952 Division of Biological Sciences - Undergraduate Research

### Step 1: Identify research mentor and research project.

Identify a faculty research mentor and, in consultation with him or her, a research project for which you have primary intellectual and technical responsibility.

### Step 2: Schedule an appointment to talk with the Director of Undergraduate Research.

Contact the Director of Undergraduate Research (Dr. David Schulz; [biohonors@missouri.edu](mailto:biohonors@missouri.edu)) to set up an appointment to discuss your research project. Dr. Schulz will ensure that the scope of your project is appropriate for Research for Credit, and can answer any questions that you may have about the process or the requirements for completion.

### Step 3 Complete and submit Guidelines and Agreement for Undergraduate Research in the Division of Biological Sciences form.

This form requires signatures from your research mentor, the Director of Undergraduate Research (Dr. David Schulz), and a professional advisor from the Division's Undergraduate Advising Office (Tucker Hall, Room 3), obtained in that order.

**Deadline:** This form must be signed by all parties by the “Last day to drop a course without a grade” in order to register for BIOSCI 4950 or BIOSCI 4952 for the current semester.

**Note:** This form must be completed and submitted every semester you intend to register for honors research.

### Step 3: Register for BIOSCI 4950 or BIOSCI 4952.

**Deadline:** This must happen on or before the “last day to drop a course without a grade” for the registration to count for the current semester. The Division's Professional Advisors in Tucker 3 can help you with the registration process if the “Guidelines and Agreement” form is submitted by the deadline described above.
